

## Quality Assurance Guarantee

A.M. Electrics Ltd guarantees the following:

- All our Electricians are fully qualified by examination and experience.
- Our aim is to deliver on time, in a professional way.
- We are members of the NICEIC as Approved Contractors and Domestic Installers
- We have Public & Employee Liability insurance up to £10million.
- We abide by all manufacturers guarantees when installing equipment.
- We work to health & safety standards.

Electrical contractors registered by NICEIC are assessed annually to ensure that they are competent and capable of meeting the relevant technical and safety standards, codes of practice and rules of the schemes they are registered to. Each scheme has a defined set of competence criteria that contractors must meet to achieve and maintain registration.

Be aware that only qualified Electrical contractors can test and inspect premises and issue certificates (Look out for Approved Contractor logo). It is not best practice in the electrical industry for a qualified electrician to be asked to test and inspect another electrician's installation on their behalf.

Contractors registered to NICEIC Building Regulations Schemes are authorised to self-certify their work without hindrance from Local Authority Building Control. This saves the client both time and money when undertaking work, that requires notification under the Building Regulations.

If you decide for whatever reason not to use us for your electrical work on this occasion, please be sure to check those you do.
